

Technical Arts Director

Southview Church is a large, multi-ethnic, multi-generational church located in Calgary's deep south, with a passion for leading people to know and follow Jesus. We have a long history of seeing lives transformed by the life-changing news of Jesus and propelled forward on mission—both locally and globally. We are passionate about making disciples in our church, in our community, and around the world. We dream of seeing our people living in unity with one another, growing in their faith, serving and caring for others, and sharing the story of who Jesus is wherever God has uniquely placed them.

We are looking for someone who brings creativity, technical expertise, and a heart for ministry to help shape the culture of technical arts and video production at Southview. If you are passionate about equipping volunteers, thrive on using technology to enhance worship and storytelling, and find joy in serving behind the scenes to create meaningful experiences, this role could be the perfect fit. Reporting to the Senior Associate Pastor of Worship & Experience and working closely with our Director of Operations, Manager of Facilities & Technology, and a team of volunteers, you will play a key role in advancing Southview's mission through technical excellence and collaborative ministry.

What you get to do:

- Recruit, train, and lead a strong team of volunteers in audio, video, lighting, livestream, and camera operations.
- Provide ongoing onboarding, training, feedback, and encouragement for tech volunteers, ensuring they feel equipped and supported.
- Oversee the filming and editing of video projects for Southview ministries.
- Maintain and troubleshoot audio, video, and livestream equipment to ensure smooth operation in services and events.
- Provide informed recommendations for equipment upgrades, improvements, and budget planning.
- Keep church technology up-to-date, including firmware, software, operating systems, and detailed equipment records.
- Collaborate with ministry leaders—including Worship, Student, and Children's Ministry—on projects and events such as the Engage program.
- Participate in weekly worship planning meetings to prepare for upcoming services and special projects.
- Foster a culture of excellence, creativity, and servant leadership within technical arts.

Who you are:

- Someone with experience in audio, video, lighting, or production in a church, nonprofit, or professional setting.
- A leader who enjoys equipping and supporting volunteers, helping them grow in both skill and confidence.
- Technically skilled with a strong ability to troubleshoot and maintain A/V equipment.
- Organized and detail-oriented, with the ability to manage multiple projects and priorities.

- A creative problem-solver with a passion for using technology to tell stories and enhance worship experiences.
- Collaborative in nature, eager to work across ministries and alongside pastoral staff.
- A person of integrity and faith who models biblical community, family life, and personal character in alignment with Southview's values.

This is a full-time, 40 hour/week, position that includes occasional evening and weekend work to support weekend services and special events. Please submit your resumé and cover letter to [Michele Black, Executive Assistant](#).

We would like to thank everyone for their application; however, only those being considered for an interview will be contacted.
